- Included SEO, responsive, multi-platform and hosting support, enabling their business to be viewed by any client in the world

Technical Skills

Proficient: Html5, CSS3 (BEM), JavaScript ES6+, React (+hooks), npm, Git, GitHub

Familiar: Redux, SASS, Yarn, React dev tools

Referees

Available upon request.

Extra info

In the year that I did Mechanical Engineering I received the Deans Commendation for both semesters. I also achieved one of the highest aggregates across the entire Engineering board. Due to this I was invited to be part of my university's student exchange program. This means that I was offered to choose from 20 universities from around the world. Proof of the above statement is available upon request. I turned the opportunity down because I had a passion for frontend development and decided to pursue it. I thereafter studied frontend development through some of the best tech industries in the world.
